Enthusiastic and driven Computer Science major pursuing a BSCS degree, with a solid foundation in JavaScript and hands-on experience in React. Passionate about contributing to impactful projects, enhancing code bases, and leveraging my skills and project background to support innovative efforts and drive team success.

PROJECTS

Pizza Ordering App
React

Developed a pizza ordering application using React, enabling users to select pizzas, customize sizes, add items to their cart, and complete the checkout process. Integrated a feature for users to view their order history. Utilized Tan Stack Router for seamless navigation.

Multi Step Form
Developed a user-friendly multi-step form using React, improving user experience by breaking down lengthy forms into manageable sections. Features include step-by-step navigation, back navigation, summary and confirmation, responsive design, interactive elements, and form validation.

Book Mark Landing Page
Developed a simple landing page for a bookmark management application using React. The page introduces the extension, highlighting its features for users and how it enhances their browsing experience.
